In addition, since pertinent information may have been developed during investigations within classifications not logically pertinent to FBIHQ's request, all NYO Managers have been asked to canvas all investigative personnel and report any relevant information developed.

Managers have also been informed that it is to be a continuing requirement that non-FCI information concerning captioned matters must be reported to FBIHQ consistent with referenced airtel.

NYO data bases that have been reviewed using enclosed key words consist of General Indices, Confidential Indices, ELSUR Indices, as well as the Investigative Support, Organized Crime and Intelligence Information Systems.

Review of IIS and related FCI files have been limited to identifying derivative non-classified criminal information within the scope of this survey.

With the concurrence of SSA [] of FBIHQ, the NYO is not conducting physical reviews of files within the 77 (General Background Investigations) and the 161 (Special Inquiry) classifications in view of the number of files (approximately 8000) and their logical pertinence. It should be noted that, frequently, the subjects of Special Inquiry leads received by the NYO are candidates for unspecified positions. Consequently, the relevance of a particular 161 inquiry to the project may be difficult to assess.

The NYO is expediting the collection, correlation and summarization of information responsive to the Bureau's request.
